

VIKHYAT YASHVANTH KOPPAL

West Lafayette, IN, USA | +1 (765) 479-9966 | vykoppal@gmail.com | LinkedIn | GitHub

U.S. Citizen – Authorized to work in the United States

PROFILE

Business Analyst with software engineering foundation skilled in requirements gathering, stakeholder management, and root cause analysis. Proficient in SQL, Tableau, Power BI, and Agile delivery. CAPM-certified MS-BAIM graduate translating business needs into actionable BRDs, user stories, and data-driven insights.

SKILLS

Programming & Tools: SQL, Python, Excel (Pivot Tables, XLOOKUP), Tableau, Power BI, Jira, Confluence

Analytics: Exploratory Data Analysis, Statistical Analysis, Predictive Modeling, Segmentation & Clustering, A/B Testing, Funnel Analysis, Root Cause Analysis, KPI Reporting, Data Visualization

Professional Skills: Agile/Scrum, SDLC Understanding, Cross-Functional Collaboration, Data Storytelling, Stakeholder Management, Meeting Facilitation, Sprint Planning, Requirements Elicitation

Certifications: CAPM® (Certified Associate in Project Management) – PMI | Business Analyst Course – Analyst Club | Tableau A-Z: Hands-On Tableau Training for Data Science – Udemy | Microsoft Certified: Azure AI Fundamentals (AI-900) – Microsoft

EDUCATION

Purdue University, Daniels School of Business

West Lafayette, IN

Master of Science in Business Analytics and Information Management, GPA: 3.63/4.00

Aug 2025 – Aug 2026

Coursework: Business Analytics, IT Project Management, AI for Business Decisions, Spreadsheet Modeling & Simulation

Visvesvaraya Technological University

Belagavi, India

Bachelor of Engineering in Computer Science & Engineering, GPA 3.38/4.00

Jun 2019 – Jul 2023

Coursework: Data Analytics, Management & Entrepreneurship for IT, Operating Systems, AIML, Social Innovation & Business

PROFESSIONAL EXPERIENCE

PartnerLinQ

Cranbury, NJ

Data Analyst – Graduate Industry Practicum

Jan 2026 – May 2026

- Performed root cause analysis on cloud telemetry data using SQL, surfacing 12.4M units of monthly resource waste and 65K+ system errors, enabling targeted remediation and measurable cost reduction.
- Mapped failure patterns and process bottlenecks across cloud data pipelines, delivering data-driven recommendations that prioritized process improvements and operational efficiency.
- Analyzed and translated cloud operational data into functional requirements to support development of an AI-driven predictive maintenance solution delivered on schedule.
- Presented data-driven findings to client decision makers, aligning analytical insights with business priorities through structured stakeholder reviews.

Versa Networks

Bangalore, India

Software Engineer

Jul 2023 – Jul 2025

- Collaborated with product managers, QA engineers, and designers to translate business requirements into 15+ production-ready UI features delivered through Agile sprints.
- Migrated 10+ application modules from Backbone.js to React, improving application maintainability, reducing technical debt, and enhancing long-term scalability of an enterprise platform.
- Reviewed 50+ pull requests and mentored 2 interns, reducing lint errors by 80% by enforcing ESLint standards.

Tequed Labs

Bangalore, India

Data Analyst Intern

Sept 2022 – Dec 2022

- Applied K-means clustering on customer data to identify 4+ behavioral segments, delivering targeted marketing recommendations to business stakeholders.
- Built 3 Tableau dashboards improving stakeholder reporting efficiency by 25% through data visualization.
- Documented analytical insights and translated findings into actionable recommendations, supporting data-driven decision making across teams.

TECHNICAL PROJECTS

AI Data Analyst Agent | Python, pandas, Streamlit, Ollama (local LLM)

- Built natural-language analytics agent routing to deterministic pandas or sandboxed Python, stress-tested on 1.1M payroll rows.
- Scored 98% (301/306) on deterministic evals by removing arithmetic from the LLM, running fully local at \$0.00/query.

AI-Powered Marketing Budget Allocation Agent | Python, Streamlit, Plotly, SciPy, scikit-learn, Google Gemini

- Built an AI agent on 5 years of eCommerce data (132K+ rows) to optimize weekly digital marketing budget allocation.
- Delivered +162% predicted conversion lift via Bayesian Optimization, KKT-verified solver, and Gemini LLM interface.
