

VIKHYAT YASHVANTH KOPPAL

West Lafayette, IN, USA | +1 (765) 479-9966 | vykoppal@gmail.com | LinkedIn | GitHub

U.S. Citizen – Authorized to work in the United States

PROFILE

Data and Business Analyst with a software engineering background and hands-on experience in SQL, Python, data visualization, root cause analysis, process improvement, and stakeholder collaboration. CAPM-certified professional with an MS in Business Analytics and Information Management from Purdue University, skilled at translating complex data into actionable business recommendations.

SKILLS

Programming & Tools: SQL, Python (pandas, NumPy), Excel (pivot tables, XLOOKUP), Tableau, Power BI, Jira, Confluence, Databricks, GCP (BigQuery), AWS (S3, Athena), Git (GitHub, GitLab)

AI & Automation: Claude Code, OpenAI Codex, Cursor, LLM Agents (Gemini API, Ollama)

Analytics: Exploratory Data Analysis, Statistical Analysis, Predictive Modeling, Segmentation & Clustering, A/B Testing, Funnel Analysis, Root Cause Analysis, KPI Reporting, Data Visualization

Professional Skills: Agile/Scrum, SDLC Understanding, Cross-Functional Collaboration, Data Storytelling, Stakeholder Management, Meeting Facilitation, Sprint Planning, Requirements Elicitation

Certifications: CAPM® (Certified Associate in Project Management) – PMI | Business Analyst Course – Analyst Club | Tableau A-Z: Hands-On Tableau Training for Data Science – Udemy | Microsoft Certified: Azure AI Fundamentals (AI-900) – Microsoft

EDUCATION

Purdue University, Daniels School of Business

Master of Science in Business Analytics and Information Management, GPA: 3.63/4.00

West Lafayette, IN

Aug 2025 – Aug 2026

Coursework: Business Analytics, IT Project Management, AI for Business Decisions, Spreadsheet Modeling & Simulation

Visvesvaraya Technological University

Bachelor of Engineering in Computer Science & Engineering, GPA 3.38/4.00

Belagavi, India

Jun 2019 – Jul 2023

Coursework: Data Analytics, Management & Entrepreneurship for IT, Operating Systems, AIML, Social Innovation & Business

PROFESSIONAL EXPERIENCE

PartnerLinQ

Cranbury, NJ

Data Analyst – Industry Practicum

Jan 2026 – May 2026

- Performed root cause analysis on Azure telemetry using SQL, identifying 12.4M monthly Cosmos DB request units in projected resource waste and mapping 65K+ system errors to recurring causes across a 31-step EDI transaction pipeline.
- Ranked pipeline failure patterns and process bottlenecks by operational impact using Excel, presenting prioritized fixes to client decision makers through structured stakeholder reviews.
- Translated error-cause mapping and Cosmos DB usage analysis into functional requirements for an AI-driven predictive maintenance solution, delivered on schedule.

Versa Networks

Bangalore, India

Technical Analyst

Jul 2023 – Jul 2025

- Built 15+ production UI features that surfaced device and traffic data from REST APIs, delivered in Agile sprints with product managers, QA, and designers.
- Migrated 20+ application modules from Backbone.js to React, reducing technical debt and improving maintainability and scalability of an enterprise platform.
- Maintained GitLab CI build pipelines with automated tests, reviewed 90+ Git pull requests and cut lint errors 80% by enforcing ESLint standards.

Tequed Labs

Bangalore, India

Data Analyst Intern

Sep 2022 – Dec 2022

- Segmented customers into 4 behavioral groups using K-means clustering in Python, informing targeted marketing recommendations for business stakeholders.
- Designed 3 Tableau dashboards that improved stakeholder reporting efficiency by 25%.
- Cleaned, transformed, and validated raw customer data in Python to prepare it for clustering and dashboard reporting.

TECHNICAL PROJECTS

AI Data Analyst Agent | Python, pandas, Streamlit, Ollama (qwen2.5-coder), pytest

- Built natural-language analytics agent routing queries to deterministic pandas or sandboxed Python, stress-tested on 1.1M rows.
- Scored 98% (301/306) on deterministic evals by removing arithmetic from the LLM, running fully local at zero API cost.

AI-Powered Marketing Budget Allocation Agent | Python, Streamlit, Plotly, SciPy, scikit-learn, Google Gemini

- Built Gemini-powered agent on 5 years of eCommerce data (132K+ rows) to optimize weekly marketing budget allocation.
- Projected +162% conversion lift vs. baseline allocation via Bayesian Optimization and a KKT-verified solver.
